Large perishable cargo facility established at Kansai International Airport

A perishable cargo facility featuring a perfect air-conditioned warehouse of 2,400 square meters, which is the largest such airport facility in Japan, has been established at Kansai International Airport on July 29th. It features the airport's first cooling equipment whereby temperatures are controlled by computer. The system will enable significant quality improvements during transportation of perishable cargo, a category that comprises 30% of all import cargo through Kansai International Airport. An opening ceremony was held on the day of the launch, with the tape-cutting performed by the presidents of KOHKU SHUHAI SERVICE CO., LTD. and Kansai International Airport Co., Ltd.
