Summary of Kansai International Airport Traffic for August 2009

Aircraft Movements:

Total aircraft movements	313 flights/day	(83% of number for 2008)
International flights only	201 flights/day	(90% of number for 2008)
Domestic flights only	112 flights/day	(72% of number for 2008)

The number of international flights (both passenger flight and freight flight) fell below the same month last year affected by the global economic stagnation and spread of influenza A (H1N1) infection.

Domestic flights made a 10-month consecutive drop from the previous year's level because of the successive suspension and the decrease in the number of flights.

Passengers:

Total number of passengers	42,900 people/day	(88% of number for 2008)
International passengers	29,400 people/day	(96% of number for 2008)
Domestic passengers	13,500 people/day	(75% of number for 2008)

The number of international passengers didn't reach the same month last year affected by the global economic stagnation and spread of influenza A (H1N1) infection. However, the number of Japanese international passengers exceeded the same month last year after an interval of 3 years.

The number of domestic passengers was below last year due to the decrease in the number of flights.

Freight:

Total freight handled	1,621 tons/day	(72% of amount for 2008)
International freight	1,503 tons/day	(74% of amount for 2008)
Freight loaded	743 tons/day	(72% of amount for 2008)
Freight unloaded	760 tons/day	(77% of amount for 2008)
Domestic freight	118 tons/day	(51% of amount for 2008)

Although the volume of international freight (both loaded and unloaded) fell much below last year's July level due to global economic free fall, the index has been recovering, hitting the bottom in January.

The volume of domestic freight didn't reach the same level as last year due to the decrease of the number of domestic flights.
