Summary of Kansai International Airport Traffic for First Half Term 2009

Aircraft Movements:

Total aircraft movements	306 flights/day	(82% of number for 2008)
International flights only	202 flights/day	(91% of number for 2008)
Domestic flights only	104 flights/day	(70% of number for 2008)

The number of international flights (both passenger flight and freight flight) fell below the same period last year affected by the global economic stagnation and spread of influenza A (H1N1) infection.

Domestic flights dropped from the previous year's level because of the successive suspension and the decrease in the number of flights.

Passengers:

Total number of passengers	36,600 people/day	(82% of number for 2008)
International passengers	24,800 people/day	(86% of number for 2008)
Domestic passengers	11,800 people/day	(74% of number for 2008)

The number of international passengers exceeded the same month last year after an interval of 17-months because of the recovery from the spread of influenza A (H1N1) infection after June, however, fell below the same period last year in first half term 2009.

The number of domestic passengers was below last year because of the successive suspension and the decrease in the number of flights.

Freight:

Total freight handled	1,586 tons/day	(68% of amount for 2008)
International freight	1,468 tons/day	(69% of amount for 2008)
Freight loaded	716 tons/day	(66% of amount for 2008)
Freight unloaded	753 tons/day	(73% of amount for 2008)
Domestic freight	117 tons/day	(54% of amount for 2008)

Although the volume of international freight (both loaded and unloaded) fell much below last year's level due to the global economic free fall, the index has been recovering.

The volume of domestic freight didn't reach the same level as last year due to the decrease of the number of domestic flights.
